Good day Luci,

I have been searching for a lawfirm with my unique situation, and during a search on Linkdn, I ran across your profile and thought to reach out.

I am seeking legal representation for two interconnected matters. These cases involve financial misconduct, regulatory negligence, and public safety risks.

I have thought long and hard about who to contact in regards to these matters, and decided I need a woman, or women, representing this case. When these cases are successful, I want to know that there are examples of strength in women, to affect real change in this world.

The paper trails for these cases are solid, and without break and have already started to unravel in governments.

These cases involve:

- Crypto.com – mishandling of funds and failure of oversight (Trump administration using this exchange)
- ECI Developments – unsafe housing developments and illegal securities offerings / sales to Canadians

1. Crypto.com – Financial Misconduct & Regulatory Failure

OVERVIEW AND EVIDENCE HERE FOR YOUR REVIEW

-> <https://www.globalscandals.com/ECI/Crypto%20Scams/Crypto.com/OMBUDSMAN/sumission/crypto-evidence-index2.html>

- I have evidence that funds were misappropriated through the platform, with clear signs of negligence or complicity by regulatory bodies.
- Despite multiple attempts to escalate the issue, both the Ombudsman and the Ontario Securities Commission are slow to act and continually delaying investigation citing lies about requirements of submission—despite having full documentation.
- I am prepared to present 100% proof that duties were neglected and financial harm resulted.

2. ECI Developments (USA Delaware) – Dangerous Solar Homes & Illegal Shares

OVERVIEW LINKED HERE

-> https://www.globalscandals.com/ECI/ECI_Development_Fraud/GranPacificaStory.html

- Since being reported to the Ontario Securities Commission and during investigation, having “restructured” from a Belize company, to a USA Delaware based company
- ECI Development has been involved in marketing solar-powered homes that pose serious safety risks, including electrical hazards and structural failures.
- In addition, shares offered to investors appear to violate securities laws, with misleading documentation and no proper registration.
- International Trust scheme defrauding billions from the middle class citizen and governments around the world. The case investigated revealed undeniable proof of the scheme in Nicaragua. Individuals in Nicaragua have already been arrested, laws re written, and land seized from owners who were attempting to defraud the government.

Proof of seized land in Nicaragua in regards to this investigation .

-> <https://ni.usembassy.gov/buying-property-and-property-disputes-in-nicaragua/>

Impact: Investors were misled, and residents face real physical danger due to this scheme.

Legal Objectives

- Civil Litigation against responsible parties for financial damages and negligence.
- Regulatory Accountability for OSC and Ombudsman failure to act.
- Public Safety Action to prevent further harm from ECI Developments and associated representatives.
- Potential Criminal Referral if evidence supports fraud or endangerment.

What I'm Looking For

- A lawyer with experience in civil litigation, regulatory law, and institutional accountability.
- Someone independent of government or corporate influence.
- Willingness to challenge entrenched systems and pursue justice assertively.
- A written conflict check confirming no ties to the parties involved (rotary club, lions club, masonic tribe)
- Client references from individuals you've represented in similar matters.

Looking forward to hearing from you.

Mark Lepore
