If you could discuss with the team. It would seem the smart package has not been delivered to my place. This is according to the material on EVA.

**The smart tech package states it's optional. What does it include and cost? If you don't opt for it, what are the standard features included?**

The cost is the same if you choose to have the smart package or not. It is a package that can be added onto the standard build out for no additional cost, ie an upgrade from a normal thermostat to a smart one, etc. Some of the smart features include: Smart locks, Central smart display/virtual assistant, Smart thermostat, Smart TV, Smart lighting, Cloud based security video, Smart plugs And more! Some clients choose to really be off the grid and don't wish to be connected. So we have it as an option to add.

**Subject:** Re: EVA Home Smart Technology

April,

What I meant was that the standard "SMART PACKAGE" is fine. Thank you for checking.

Best regards,

Mark

**Subject:** EVA Home Smart Technology

Good Afternoon,

Following is a list of smart technology items that are automatically included in your EVA tiny home. If you would prefer that standard fixtures (non-wifi based) are used please let us know asap. Note that if we do not hear from you we will assume smart technology is acceptable, but it would be great if you would let us know either way.

**SMART TECHNOLOGY**

- Smart Lock
- Smart Display/Virtual Assistant
- Smart Thermostat/s (depending on home model)
- Smart TV/s (depending on home model)
- Smart Lighting
- Cloud Based Security Video Cameras x2
- Smart Plugs x 4

Thank you. Please let me know if you have any questions.

April Hess
